About the author	xii
Introduction	1
Chapter 1 Getting to know ATLAS.ti	9
Some basic terms and concepts	9
The ATLAS.ti user interface	10
Starting the program	11
Opening the sample project	12
Context menus	12
The drop-down menus and object managers	13
Navigating the list of codes	17
A preview of the network view function	18
A preview of the query tool	18
‘Survival tips’ to find your way around the main menu	19
The toolbars	20
Summary	21
Solutions to the ‘survival’ exercise	21
Review questions	21
Glossary of terms	21
Chapter 2 Data preparation	23
Supported file formats	23
Compatibility	23
Choosing between different text formats	25
Language support	26
Font settings	27
System settings for Thai and Asian language support on Western European and US Windows systems	27
Preparing documents	27
Transcription	27
Best practice rules and solutions in a nutshell	31
Review questions	32
Chapter 3 Project management: project setup for single users and teams	33
What you need to know before setting up a project	34
Data handling in ATLAS.ti	34
Description of the sample data set	39

Setting up a project	40
Scenario 1: the one folder setup – for single users and teams	40
Scenario 2: working with internal documents (for projects containing only text files)	55
Scenario 3: project setup for transcripts and synchronized media files	56
Scenario 4: documents and HU file need to remain at different locations	58
Summary	60
Review questions	61
Glossary of terms	61
Chapter 4 Technical aspects of coding	63
Variants of coding	63
Open coding	63
Coding via drag and drop	69
Writing comments for coded segments	72
Coding with in-vivo codes	73
Further coding-related options provided by the Code Manager	74
Coding other media types	79
Coding a PDF document	79
Coding an image document	80
Coding audio and video files	80
Coding an audio or video quotation	82
Coding a Google Earth document	86
Summary	88
Review questions	88
Glossary of terms	89
Chapter 5 Embarking on a journey – coding the data material	91
The NCT model of qualitative data analysis	92
Noticing things	92
Collecting things	93
Thinking about things	100
Projecting the NCT model onto computer-assisted qualitative data analysis	100
The journey begins: noticing things and collecting them	103
Feedback session: what did you find?	104
How to add more structure to your exploration	104
More on code word labels	112
Skills training day	113
Skills training 1: developing subcategories	113
Skills training 2: searching for a common denominator – building categories from the bottom up	117
Skills training 3: rules for hierarchical coding schemes	121

Advantages of well-sorted and structured code lists	122
Moving on	128
'Open book' assessment after completing skills training 1–3	129
Test your understanding of computer-assisted NCT analysis	129
Glossary of terms	130
Further reading	131
Chapter 6 Further steps in the data analysis process	133
Introducing the memo function	133
Skills training 4: some technicalities of memo writing	135
Examples of stand-alone memos	136
Changing memo settings	138
Linked memos	140
Summary of skills training 4	148
'Open book' assessment after completing skills training 4	149
Positioning and further directions for the onward journey	149
Skills training 5: introducing the query tool	150
The retrieval language	152
The three sets of operators	152
Miscellaneous useful query tool functions	159
Exploring the data terrain further – the journey continues	161
Examining RQ1a (finding co-occurring segments)	162
Examining RQ1b (getting to know the co-occurrence explorer tree view)	162
Examining RQ2a (combining code queries with variables + creating superfamilies)	165
Examining RQ2b (exporting code frequencies per document)	169
Examining RQ3 (exporting code frequencies per document)	171
Examining RQ4 (finding co-occurring segments in combination with variables)	171
Examining RQ5 (getting to know the co-occurrence explorer table view + creating superfamilies)	174
Saving a query for later reference (or working with supercodes)	178
Climbing the hills and clicking more complex queries	180
Intermezzo	184
On the use of code families	184
Summary	187
'Open book' assessment of analysis tools	187
Further reading	188
Glossary of terms	188
Solutions	
A reminder of set theory for understanding Boolean operators	190
Query for RQ1a: is direct speech used in headlines?	190
Query for RQ3: which topics are reported in US vs. German newspapers, local as compared to national papers?	
Are there differences?	190

Chapter 7 Working with network views	191
Skills training 6	192
Learning terminology	192
Creating network views	194
Importing nodes	197
Removing nodes	197
Moving nodes	198
Layout options	198
The refresh option (F5)	199
Displaying code families in network views	199
Exporting network views	200
Saving network views	200
Display menu	201
Relations Editor	203
Modifying an existing relation	206
Creating a new relation	206
Use of colors and images in network views	207
Code colors in network views	208
Utilizing code colors to show patterns in the data	209
Dealing with case-based network views	209
On the use of network views for structural purposes	211
Using network views to present conceptual-level analysis	216
Hyperlinks in ATLAS.ti	221
Examples for using hyperlinks	221
Skills training 7: working with hyperlinks	222
Summary	225
'Open book' assessment on the network view function	226
Glossary of terms	226
Further reading	227
 Chapter 8 The method of computer-assisted NCT analysis	 228
The cyclical nature of analysis: Notice-Collect-Think	228
Descriptive level analysis	229
First-stage coding	229
Adding structure to the code list	231
Second-stage coding	233
Conceptual-level analysis	233
Writing research question memos	234
Visualizing	235
The role of memos in NCT analysis	236
Software functions throughout the NCT process of analysis	237
Teaching computer-assisted NCT analysis	237
 Addenda	 240
Editing primary documents	240

Why you may want to edit a document	240
What you should know about editing	241
How to edit	244
Editing primary documents in team situations	245
Best practice rules for editing primary documents	246
Merging projects	247
Prerequisites for merging	247
How to merge	247
After the merging process	251
Creating backups	252
Backup options for the HU	252
Backup or transfer of the completed project via copy bundle	253
Troubleshooting: what to do if primary documents become unusable	258
Pay attention to the status bar	258
Creating accessibility reports	259
Modifying the project setup	263
Exchanging doc or docx files with rtf files (changing paths)	263
Missing converters	264
Review questions	265
References	266
Index	270
