

CONTENTS

<i>Preface</i>	ix
<i>Guided tour</i>	xi
<i>Online teaching and learning resources</i>	xiii

1 INTRODUCTION 1

1.1 What can you expect?	2
1.2 The use of computers	3
1.3 A teaching note	4
1.4 The web site	4
1.5 Further reading	5

2 BASIC SUMS 7

2.1 Where do you want to start?	8
2.2 Algebra	8
2.3 Powers	9
2.4 Graphs	10
2.5 Functions	11
2.6 Roots of a quadratic	19
2.7 Simultaneous equations	22
2.8 Inequalities	24
2.9 Frequency counts	26
2.10 Percentage changes	27
2.11 Conclusions	29
2.12 Exercises	29
2.13 Annotated answers	31

3 USING GRAPHS 43

3.1 Time series graphs	44
3.2 Break-even analysis	45
3.3 Linear programming	50
3.4 Linear programming – minimization	54
3.5 Conclusions	56
3.6 Exercises	57
3.7 Annotated answers	58

4

REPRESENTING DATA

69

4.1 Why use statistical graphs?	70
4.2 Simple bar chart	70
4.3 More complex bar charts	72
4.4 Pie charts	74
4.5 Pictograms	78
4.6 Histograms	78
4.7 Using Excel	82
4.8 Conclusions	83
4.9 Exercises	83
4.10 Annotated answers	87

5

AVERAGING

95

5.1 Calculations for a simple list of data	96
5.2 Calculations for tables of discrete data	98
5.3 Calculations for tables of continuous data	99
5.4 Conclusions	103
5.5 Exercises	105
5.6 Annotated answers	107

6

MEASURES OF DIFFERENCE

111

6.1 Measures of difference for a simple list of data	112
6.2 Measures of difference for tables of discrete data	115
6.3 Measures of difference for tables of continuous data	117
6.4 Conclusions	121
6.5 Exercises	121
6.6 Annotated answers	124

7

MAKING COMPARISONS USING INDEX NUMBERS

131

7.1 What is an index number?	132
7.2 Comparisons with a single set of figures	132
7.3 Time-aligning series	135
7.4 Comparisons with groups of figures	138
7.5 Base weighting	138
7.6 Current weighting	140
7.7 Retail Prices Index	142
7.8 Published series	142
7.9 Conclusions	144
7.10 Exercises	144
7.11 Annotated answers	150

8

WORKING WITH POSSIBLE RELATIONSHIPS

159

8.1	Plotting the data	160
8.2	Measuring the strength of a linear relationship – the correlation coefficient	162
8.3	Finding the equation of the line – regression	166
8.4	Making a forecast	169
8.5	Making a forecast using more than one (independent) variable	169
8.6	Assessing the relationship for ranked data	173
8.7	Conclusions	175
8.8	Exercises	175
8.9	Annotated answers	178

9

PROJECTING THE FUTURE

185

9.1	Using a linear (regression) model	186
9.2	Modelling a time series	188
9.3	The determination of trend	191
9.4	Forecasting allowing for seasonal variation	195
9.5	Odd number time periods	199
9.6	Conclusions	203
9.7	Exercises	204
9.8	Annotated Answers	206

10

COMPARING MONETARY RETURNS OVER TIME

217

10.1	Costs and benefits	218
10.2	Payback	218
10.3	Time-value of money	220
10.4	Net present value	222
10.5	Choosing r	224
10.6	Ranges of benefits	225
10.7	Conclusions	226
10.8	Exercises	227
10.9	Annotated answers	229

11

PROBABILITY

235

11.1	Defining probability	236
11.2	A few rules	237
11.3	Dependent events	240
11.4	Expected values	241
11.5	Decision trees	241

	11.6 Binomial probabilities	245
	11.7 Normal distribution	248
	11.8 Conclusions	253
	11.9 Exercises	254
	11.10 Annotated answers	256
12	COLLECTING DATA	263
	12.1 The use of data	264
	12.2 The focus of enquiry	264
	12.3 Sample selection	266
	12.4 Sample design	266
	12.5 Sample size	269
	12.6 Asking questions	270
	12.7 Framing questions	275
	12.8 Sources of error	276
	12.9 Conclusions	277
	12.10 Exercises	278
	12.11 Annotated answers	279
13	USING OTHER SOURCES OF INFORMATION	285
	13.1 Browsing	286
	13.2 Making a start	287
	13.3 Using official statistics	289
	13.4 Other sources of data from the web	293
	13.5 Making an internet search	293
	13.6 Conclusions	294
	13.7 Exercises	295
	13.8 Annotated answers	295
14	CONCLUSIONS AND PREPARING FOR ASSESSMENT	299
	14.1 Coursework and assignments	300
	14.2 Tests and exams	304
	14.3 Conclusions	314
	<i>Appendix I: Discount factors or present value factors</i>	315
	<i>Appendix II: Areas in the right-hand tail of the normal distribution</i>	317
	<i>Glossary</i>	319
	<i>Index</i>	325
	<i>Excel Guide for PC Users</i> by Mark M. H. Goode	EXCEL 1
	<i>Formula sheet</i>	INSIDE BACK COVER
