

Contents

Introduction / 9

Chapter 1

Liberalization and energy security—definition and the scope of study / 13

- 1.1 Purpose of the study and justification of its subject matter / 13
- 1.2 Liberalization and energy security—definition and research questions / 22
- 1.3 Research hypotheses and expected outcomes / 35
- 1.4 The study structure and research sources / 37

Chapter 2

Energy security and energy solidarity as elements of the European Union's common energy policy—legal and geopolitical aspects / 41

- 2.1 Common energy policy of the European Union. Relations and prospects for development / 41
- 2.2 Geopolitical and legal background of the EU energy security—towards a common position of the EU member states / 50
- 2.3 Energy security and energy solidarity in the Treaty on the Functioning of the European Union as a fundamental of the EU common energy policy / 62
- 2.4 Regional solidarity within the concept of energy security in the Energy Community Treaty—new dimension of the EU external energy policy? / 73
- 2.5 Legal instruments for energy market harmonization and liberalization as an element of implementation of energy security policy / 79
- 2.6 Conclusions / 91

Chapter 3

Legal and institutional aspects of energy security on the Polish gas market / 94

- 3.1 Energy security as a paradigm for a country's economic development / 94
- 3.2 Energy security in a legal comparative perspective—comparison between gas and electricity markets / 103
- 3.3 Geopolitical and legal background determining energy security in the Polish gas sector—shale gas as an opportunity to increase import independence? / 113
- 3.4 The role of state administration in defining energy policy including objectives and the legal framework of gas market operations in Poland / 122
- 3.5 Regulation No. 994/2010/EU as a legal instrument of ensuring energy security on the Polish gas market / 128
- 3.6 The importance of reserves (stocks) of gas to energy security—example of “the Act on stocks” / 137
- 3.7 Energy efficiency and its impact upon energy security / 152
- 3.8 Conclusions / 160

Chapter 4

Gas market liberalization as an instrument to implement energy security policy—regulatory aspects / 163

- 4.1 Key legal aspects of the third energy package regarding gas market liberalization in the context of energy security / 163
- 4.2 Independent system operator as an instrument of safeguarding the energy security / 169
- 4.3 Free and equal access to gas infrastructure as guarantee of security of gas supply / 198
- 4.4 Gas market regulation in Poland—new dimension of infrastructural sectors regulation / 218
- 4.5 Independent regulatory body as gas market “supervisor” and its impact upon energy security / 226
- 4.6 Conclusions / 241

General conclusions / 243

Bibliography / 253
