

Table of contents

Foreword	11
Preface	13
1. The need for food product design	15
<i>Martinus A.J.S. van Boekel and Anita Linnemann</i>	
1.1. Introduction	15
1.2. Societal setting	17
1.3. The role of science and technology	19
1.4. Developments in food processing	20
1.5. Tackling consumer preferences	21
1.6. Concluding remark	21
References	25
2. Creativity and innovation	27
<i>Corrinne J. Goenee</i>	
2.1. Introduction	27
2.2. Key success factors for innovation	30
2.3. Organisational requirements for successful innovation projects	31
2.4. Creative thinking techniques	33
2.5. Key success factors for business creativity	34
2.6. Required mindset	37
2.7. Required thinking capabilities	38
2.8. The brainstorming process	39
2.9. In practice	45
2.10. How to hit the bull's eye	48
References	50
3. Structured food product development based on Quality Function Deployment	53
<i>Marco Benner, Matthijs Dekker and Anita Linnemann</i>	
3.1. Introduction	53
3.2. Quality Function Deployment step by step	54
3.3. Benefits and limitations of the Quality Function Deployment method	58
3.4. The Chain Information Model	59
References	65
4. Modelling of reactions affecting food quality	67
<i>Martinus A.J.S. van Boekel</i>	
4.1. Introduction	67
4.2. Key reactions in foods	67
4.3. Types of models	73
4.4. Modelling of food quality attributes	74

Table of contents

4.5. Applications of models to reactions in foods	93
4.6. Statistical design of experiments in relation to food product design	101
4.7. Future developments	103
References	103
5. Barrier technology in food products	107
<i>Remko Boom, Karin Schroën and Marian Vermuë</i>	
5.1. Introduction	107
5.2. Thermodynamics and sorption	109
5.3. Kinetics: diffusion	112
5.4. Barrier technology: practical aspects and guidelines	120
5.5. Heterogeneous films	120
5.6. Prevention of defects in barrier films	122
5.7. Guidelines for application of coatings	127
5.8. Mechanical behaviour	133
5.9. Wetting behaviour	135
5.10. Migration of other components	137
5.11. Guidelines for the selection of edible-barrier films	138
5.12. Some experimental data	140
References	148
6. Emulsions: properties and preparation methods	151
<i>Karin Schroën and Remko Boom</i>	
6.1. Introduction	151
6.2. Emulsions	152
6.3. Emulsion preparation	164
6.4. Emerging emulsification technologies	170
6.5. Outlook and challenges for emulsification technologies	185
Acknowledgement	190
References	190
7. Food packaging design	197
<i>Matthijs Dekker</i>	
7.1. Introduction	197
7.2. Packaging materials as a barrier	198
7.3. Modified atmosphere packaging	200
7.4. Active packaging	201
7.5. High pressure processing	202
7.6. Convenience	202
7.7. Intelligent packaging	203
7.8. Modelling in package design	203
7.9. Conclusions	204
References	204

8. Aspects of hygienic design	207
<i>Huub L.M. Lelieveld</i>	
8.1. Introduction	207
8.2. Possible threats	208
8.3. Factory design	210
8.4. Equipment design	214
8.5. Design of process lines	220
8.7. Concluding remarks	223
References	224
9. Life Cycle Assessment (LCA): what is it and why is it relevant in food product design?	227
<i>Chris E. Dutilh</i>	
9.1. Introduction	227
9.2. What is LCA?	228
9.3. Who can benefit by it?	230
9.4. How to start an LCA study	232
9.5. How to carry out an LCA, step by step	233
9.6. Illustrative case-studies	238
9.7. Further information	239
9.8. Some LCA jargon	239
Acknowledgements	240
10. Managing knowledge for new product development	241
<i>Peter Folstar</i>	
10.1. The role of knowledge in the food industry	241
10.2. Basic principles of knowledge management	245
10.3. Knowledge in industrial environment	248
10.4. Knowledge management and human resources	251
10.5. Operational aspects of knowledge management	254
10.6. Concluding remarks	260
References	261
11. Case study: development of a ready-to-eat meal for the health-conscious consumer	263
<i>Marco Benner and Ruud Verkerk</i>	
11.1. Introduction	263
11.2. Ready-to-eat meals	264
11.3. Health protective glucosinolates	264
11.4. The production chain of ready-to-eat meals	265
11.5. How to use the Chain Information Model?	266
11.6. Conclusion	272
References	274
Epilogue	275
Keyword index	277
