<i>List of Figures and Tables</i>	vii
-----------------------------------	------------

<i>Preface</i>	xiii
----------------	-------------

Part I The Discovery of Business Cycles	1
--	----------

1. Gambling Man	3
2. Cash Payment	19
3. The Dream Team of Money	27
4. The Napoleon of Finance	47
5. Jay and the Phantom Gold	57
6. Seven Pioneers	67

Part II The First Business Cycle Theories	81
--	-----------

7. The Golden Era	83
8. The Archeologists	101
9. Fisher and Babson	107
10. Keynes and the Austrians	117
11. The Great Depression	127
12. Lover, Horseman, Economist	141
13. The Problem with Money	153

Part III A Hidden World	165
--------------------------------	------------

14. The Simulators	167
15. Brains of Steel	189
16. Fat Tails and All That	199
17. Monkey See, Monkey Do	213
18. Dot Bomb	231

Part IV The Essence	239
19. The State of the Art	241
20. Three Questions	251
21. The Five Main Drivers of Cycles	257
22. The Ten Challenges of Central Banking	271
Part V Business Cycles and Asset Prices	305
23. The Mother of All Cycles: Property	307
24. When Art was In	333
25. All That Glitters	349
26. What Things are Made of: Commodities	367
27. Bonds, Stocks and Funds	379
28. The World's Biggest Market: Foreign Exchange	391
29. Business Cycles and Market Rotation	399
<i>Afterword: The Beat of the Heart</i>	421
<i>Appendix 1: List of Important Events in Business Cycle Theory</i>	423
<i>Appendix 2: List of the Largest Financial Crises in History</i>	429
<i>Chapter Notes</i>	433
<i>Bibliography</i>	449
<i>Index</i>	471

List of Figures and Tables

Figure 1.1	John Law of Lauriston.	8
Figure 2.1	Philippe d'Orleans.	21
Figure 2.2	The South Sea Company stock price 1719–1720.	25
Figure 3.1	Map of England and Scotland when Adam Smith moved to Oxford.	29
Figure 3.2	Adam Smith.	33
Figure 3.3	Henry Thornton.	37
Figure 4.1	Receipts from sales of public lands in USA, quarterly 1816–1860.	51
Figure 5.1	Jay Gould.	60
Figure 6.1	Simon Newcomb.	75
Figure 7.1	The crash in 1907.	91
Figure 7.2	The acceleration principle.	96
Figure 9.1	Roger Ward Babson.	108
Figure 9.2	Babson and secretary.	109
Figure 10.1	John Maynard Keynes	121
Figure 11.1	<i>New York Times</i> front page, October 25, 1929.	131
Figure 11.2	Jesse Livermore.	132
Figure 11.3	The Great Crash 1929–1932.	133
Figure 12.1	Joseph Schumpeter.	143
Figure 12.2	Schumpeter's three-cycle schema.	149
Figure 13.1	Milton Friedman.	160
Figure 13.2	The Phillips curve.	162
Figure 14.1	The Cobweb Theorem.	168
Figure 14.2	The echo phenomenon in Norwegian ship-building.	170
Figure 14.3	Factor analysis for Samuelson's simulation of the accelerator and the multiplier.	180
Figure 15.1	The ENIAC.	191
Figure 15.2	The Whirlwind Computer.	193
Figure 15.3	Effective inventory in actual performance of the beer game.	196
Figure 16.1	A Kondratieff cycle simulation.	206

Figure 16.2	Simulation of automatic synchronization between Kondratieff and Kuznets cycles.	206
Figure 16.3	Simulation of automatic synchronization between Kondratieff and Kitchin cycles.	207
Figure 16.4	Phase space of Kondratieff synchronization with external cycles.	208
Figure 16.5	Feigenbaum cascade in cycle synchronization.	209
Figure 17.1	Market rotation up to the crash in 1987.	216
Figure 17.2	Which central circle is bigger?	218
Figure 17.3	Are these lines parallel?	219
Figure 17.4	Which line has the same height as the “test line”?	219
Figure 17.5	Positive feedback loops based on the hindsight effect and regret.	223
Figure 17.6	Positive feedback loops based on chart-based buy recommendations from technical analysts.	224
Figure 17.7	Positive feedback loops based on the representativeness effect.	224
Figure 17.8	Positive feedback loops based on people’s tendency to feel that they “play with house money”.	225
Figure 17.9	Positive feedback loops based on media rationalizations.	225
Figure 17.10	Positive feedback loops based on the false consensus effect.	226
Figure 17.11	Positive feedback loops based on stop-loss buy orders from people that have sold short too early.	226
Figure 17.12	Illustration of the entire emotional accelerator.	227
Figure 18.1	NASDAQ 1970–2005.	237
Figure 21.1	Approximate distribution of different gross variable-price asset classes in modern economies, % of total.	261
Figure 21.2	Typical approximate proportions of major swing factors in modern economies, % of GDP.	268
Figure 22.1	How central banks manage money.	273
Figure 22.2	Aggregate asset prices and economic activity in the United Kingdom, 1970–2003.	277
Figure 22.3	Aggregate asset prices and economic activity in the USA, 1970–2003.	278
Figure 22.4	Aggregate asset prices and economic activity in Japan, 1970–2003.	279
Figure 22.5	The fallout in GDP from equity and house price busts, respectively.	280

Figure 22.6	The fallout in capital spending and building construction from equity and house price busts, respectively.	281
Figure 22.7	The fallout in credit and money supply from equity and house price busts, respectively.	282
Figure 22.8	The cross-correlation between busts in house prices and in equity prices.	283
Figure 22.9	Bank provision on bad loans during busts in house prices and in equity prices.	283
Figure 22.10	Breakdown in the monetary flow process.	291
Figure 23.1	Land prices in Chicago, 1830–1933.	310
Figure 23.2	The quantity equation and a sequence of its most visible effects.	316
Figure 23.3	Property sector rotation over the property cycle.	320
Figure 23.4	Relative volatility in retail, office and industrial property markets.	321
Figure 24.1	Mei Moses All Art Index.	336
Figure 24.2	Mei Moses All Art Index and Japanese land prices for six cities, 1975–1996, indexed.	337
Figure 24.3	Ferrari prices 1985–2005.	339
Figure 24.4	A hierarchy of asset purchases.	344
Figure 24.5	The drivers of collectibles markets over business cycles.	346
Figure 25.1	The 1980 diamond bubble.	358
Figure 25.2	The silver bubble and Nelson Bunker Hunt.	359
Figure 25.3	Correlation between gold, silver and platinum prices.	360
Figure 26.1	CRB Commodity Index 1970–2004.	371
Figure 27.1	Bond market behavior over business cycles.	381
Figure 27.2	Equity market behavior over business cycles.	384
Figure 28.1	Correlation between Australian dollar exchange rate index and CRB commodity price index 1984–2005.	395
Figure 28.2	Correlation between New Zealand dollar exchange rate index and CRB commodity price index 1985–2005.	396
Figure 28.3	Correlation between Canadian dollar exchange rate index and CRB commodity price index 1984–2005.	396
Figure 29.1	The role of real money rates in asset valuation.	403
Figure 29.2	The first inventory cycle in the multi-cycle reference model.	406

Figure 29.3	The first capital spending cycle in the multi-cycle reference model.	411
Figure 29.4	Property cycle in the multi-cycle reference model.	415
Figure 29.5	Financial sequences around the business cycle.	419
Table 1.1	French government finances in 1716.	10
Table 3.1	Innovations leading to the Industrial Revolution.	34
Table 10.1	American key figures, 1922–28.	123
Table 11.1	American key figures, 1928–33.	134
Table 12.1	The most cited macroeconomists on monetary issues and business cycles, 1920–39.	152
Table 13.1	Proposed solutions to stabilizing Newcomb's equation and hence solving the business cycle problem.	161
Table 14.1	Combining the multiplier with the accelerator.	179
Table 17.1	The ten largest one-day declines in the Dow Jones Industrial Average.	217
Table 19.1	Overview of different approaches to business cycle modeling.	247
Table 21.1	The five main elements in economies causing business cycles.	258
Table 21.2	Estimate of global variable-price assets in 2004, in trillion dollars.	260
Table 21.3	Estimates of the wealth effect.	262
Table 21.4	The ten worst calendar years for Dow Jones Industrials.	263
Table 21.5	Imagined disaster scenario in stagflation environment.	267
Table 22.1	Extraordinary measures to reverse declines in volatility.	290
Table 23.1	Leading indicators for UK commercial property, 1986–2002, in months.	323
Table 23.2	Timing sequence of property markets and recessions, 1818–1929.	326
Table 23.3	Distribution of British national income 1920–1939.	326
Table 23.4	Leading indicators for land prices.	327
Table 23.5	Income shares as a percentage of GNP at factor cost, UK, 1955–1973.	327
Table 23.6	Leading indicators and cyclical behavior for residential property.	330

Table 23.7	Leading indicators and cyclical behavior for commercial property.	331
Table 24.1	Performance correlation between art and other asset classes, 1978–2003.	344
Table 25.1	Return correlation between gold and other asset classes.	361
Table 25.2	Behavior of precious metals over business cycles.	361
Table 25.3	Leading indicators for gold.	362
Table 25.4	Behavior of precious metals and diamonds in relation to their demand drivers.	364
Table 26.1	Average global per capita consumption of selected commodities, in kilos, 2004.	368
Table 26.2	Cyclical behavior of selected industrial metal futures.	374
Table 26.3	Cyclical behavior of stock and bond futures.	374
Table 26.4	Geoffrey Moore's leading indicators for metals.	376
Table 26.5	Cyclical behavior of lumber futures.	377
Table 26.6	Cyclical behavior of energy futures.	377
Table 27.1	Overview of categories of hedge funds and private equity funds.	386
Table 27.2	Hedge fund behavior over business cycles.	387
Table 27.3	Private equity fund performance over business cycles.	388
Table 27.4	The winners and losers when oil prices rise.	389
Table 28.1	Selected contributions to composition of non-energy price indices for Australia, New Zealand and Canada, based on average world market prices in USD 1972–2001.	394
Table 28.2	Correlations between commodity currency performance and selected commodities and commodity indices.	397
Table 29.1	Commercial motives for investing in different asset classes/investment vehicles.	402
Table 29.2	Performance of different asset classes in the UK to 2004.	404
Table 29.3	Economic characteristics of a typical inventory cycle (Kitchin cycle).	405
Table 29.4	Typical asset price behavior over inventory cycles.	408
Table 29.5	Economic characteristics of a typical capital spending cycle (Juglar cycle).	412

Table 29.6	Typical asset price behavior over capital spending cycles.	413
Table 29.7	Economic characteristics of a typical property cycle (Kuznets cycle).	416
Table 29.8	Typical asset price behavior over property cycles.	417
